About This Content

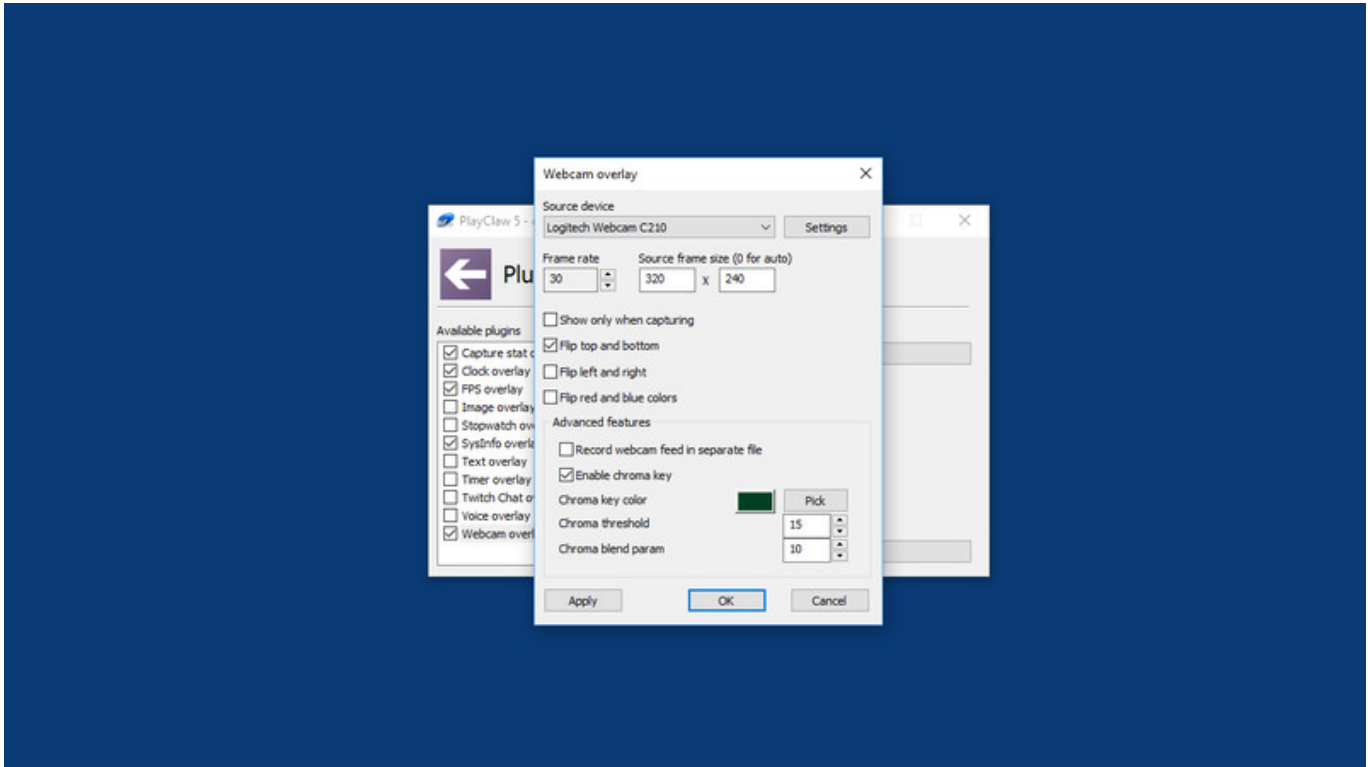

The Chroma Key extension for the PlayClaw overlays composites captured gameplay video with a real time webcam feed (or other overlays video) based on color hue (chroma range). Or in other words, "Green Screen". All you need to do is select a Chroma Key color and the software will make that color transparent thereby revealing gameplay video in the background.

Title: PlayClaw 5 - Chroma Key for overlays
Genre: Audio Production, Software Training, Utilities, Video Production
